EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Thomas Basso on 2/28/06.

The application has been amended as follows:

In claim 21, last line: after "from 1.5% by weight to 10% by weight" add "wherein a weight ratio in the conductive agent of the flaky graphite to the granulated carbon is about 1:1".

Cancel claims 22 and 29.

The following is an examiner's statement of reasons for allowance: the claims are directed toward a battery comprising a positive electrode and a negative electrode wherein a conductive agent is contained in each of the electrodes in a range of from 1.5 wt% to 10wt%. The conductive agent consists essentially of flaky graphite, granulated carbon and carbon black having the sizes and weight ratios recited by claim 21. Table 4 provides evidence of unexpected results regarding the capacity maintenance ratio [%] over the prior art of record. The claims have been amended commensurate in scope with the amounts of flaky graphite, granulated carbon and carbon black contained in the conductive agent.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
